BUY TO CONSTRUCT 23,000 AUTO TRUCKS

Even in these days of mammoth motorcar production and sales, figures are often quoted which leave one gasping in amazement. C. L. Fauber, sales manager for Saxon Motor Sales Co., Republic internal gear drive truck distributor for Arizona, submitted some facts and figures in an interview which gave an idea of the size and scope to which commercial car production has grown.

"The claim that the Republic Motor Truck Company of Alma, Mich., is the largest exclusive truck manufacturer in existence is not without foundation," said Mr. Fauber. "While I was at the factory I personally saw contracts entered into for raw materials and parts to construct 23,000 trucks for the year beginning October 1. At the same time advance cash deposits on these contracts to the amount of \$600,000 were paid out.

"A small delivery truck of 1250 pounds capacity, internal gear driven of course, has been announced by the Republic Company, and they will build at least 10,000 of these the coming year.

"The present factory space occupies 300,000 square feet, and new additions which will increase this space about 75 per cent are now being erected. The product of our factory is distributed through 407 agents, 309 of which han-

die nothing but Republic trucks. Forty-eight states in addition to foreign business are represented by one or more agencies."

"LAST MAN CLUB" IN SESSION.

Eight of Eleven Survivors of Civil War Company Held Reunion.

Fifty-five years after their complete organization met for the last time, eight survivors of Company B, First Minnesota Regiment, gathered in Stillwater for their annual reunion.

The octet are members of the "Last Man's Club," which now numbers eleven. At the Battle of Bull Run the company lost its baptism of fire.

A memorial was held for comrades who lost their lives in that engagement, and those who have since died. Thirty-two men comprised the original "Last Man's Club," which derives its name from the fact that the last survivor is to become the possessor of a bottle of wine given the club years ago.

Draped chairs were placed at the table for dead members, empty places were left for three living members, too feeble to attend.

The bottle of wine, taken from the vault of a Stillwater bank, occupied a conspicuous place on the table, together with the club's roster.

The gathering included Adam Marty of St. Paul, 78 years old; John S. Goff, 72; Myron Shepherd, 83; Samuel Bloomer, 79; Peter Hall, 77; Emil Graff, 76; Jacob Groseman, 83; and William Kelly, 72—St. Paul Dispatch.

Hire a Little Salesman at the Republican office. A Want Ad. will see more customers than you can.

NEW VELVET SAILOR WILL BE ONE OF AUTUMNS MOST POPULAR FASHIONS

A new sailor for fall.

This new sailor for fall wear is of brown velvet with unusual trimming of silver braid about the brim at odd intervals. A quill drawn through the crown adds to its smart air.

If You Knew The Importance of GOOD DRINKING WATER

You Would Demand
THE PERCOLATION SYSTEM

This patented device—drop by drop—will furnish 3 to 5 gallons of germ-proof water daily—perceptibly softened—delightfully cooled. Price \$6.50. Satisfaction guaranteed or money refunded.

Crossing the Cauca

(Continued from Page Four)

great comb that turned back and burrowed into the foaming waters. Deflected at a right angle, the river swings to the left and passes through a great rent in the dyke and plunges below. No man could make that turn and live even if he could keep afloat until the dyke were reached.

Meanwhile the alcalde was removing his clothes and giving instructions to the interpreter to be passed to us. We were to remove all clothing but the nether part of the underwear. Each was to make up his clothes into a tight bundle and to put it inside of his shirt and to tie the sleeves of the latter together. We watched the alcalde narrowly. He asked the interpreter to tell me that I was to have the best and the longest piece of the three, and that all would be well. We watched the alcalde. The rocks whereon we sat produced a small eddy behind them, a space of slightly less turbulent waters. The "palo" was lowered into this semi-quiet water. I had been so preoccupied before this that I had given but little attention to the de-

tails of the construction of this wonderful raft. It was made of an exceedingly light wood called "balsa" or "baregonc," and was constructed in two similar parts. Each part was a timber about seven inches square at the butt and about ten feet long. The forward end was tapered to a point and turned like the prow of a canoe. The two timbers were shaped to fit one another and were fastened together by two slender cords of "pita." That was all there was to be between me and a berth in the roaring Cauca.

When the "palo" was lowered into the water the alcalde descended also and threw a little water on his chest. He stood silent for a moment, dropped his chin on his breast, crossed himself, and I saw his lips move in prayer. That didn't look good to me; the alcalde was taking the matter too seriously. Even Turner was silent for a moment. But we had more to learn. The alcalde got astride of the "palo" and took a position forward of the center, lying belly down with his legs in the water and his arms clasped about the "palo." The pilot with the bundle of the alcalde's clothes on the back of his neck, the "palo" was lowered into the water, and the center being clamped by the teeth, laid down on the "palo" stern of the alcalde. The craft floated the

passenger and pilot, but it was nearly under water.

The pilot gently and cautiously guided the "palo" into the upstream eddy current and moved the craft towards the humped-up racing current. With a quick propulsive movement the "palo" with its human freight shot into the stream and disappeared for a moment. My heart sank within me. In another moment we saw them far below, appearing for an instant on the crest of a great "riffle" wave, disappearing and appearing again, the arms and legs of the pilot flailing the water in his exertions to keep the craft at right angles to the flow and to propel it forward. It seemed an incredibly short time before the two had been carried half a mile down the stream. We saw them move into eddy water, the nose of the "palo" up stream, the two chattered and clattered out on the rocks just above the town. The pilot took up his "palo" and placing it on his shoulder proceeded on his mile walk up stream to again cross the river.

The interpreter told me that the alcalde had arranged for me to go next. The pilot already had his "palo" in the water awaiting me. I had been so much absorbed in watching the alcalde and his crossing of the river that I had forgotten to disrobe. Since it is customary to wear the least quantity of clothing in this country, it did not take me long to disrobe and arrange my clothes as per the instructions and example of the alcalde, and I descended to the eddy. The pilot, I had noticed this before, was a big, powerful fellow, and I calculated with some trepidation that he was no featherweight. As I tipped the scales to the figure of 188 pounds, the fear entered my soul that the "palo" might not be equal to the task of floating the two of us. I gave the results of my fear-some calculations to the interpreter and asked him to ask the pilot about it. I was assured that the two of us would undoubtedly sink the craft, but the further we entered the water the less we would weigh, so that we would only go so far. The physics of this proposition being reasonably clear, I stepped into the water and gave some water on my chest. Further I did not follow the alcalde's devout example. During all of this time I was receiving an unstinted quantity of joking, chaffing and burlesque admonitions from Turner, but I was too much absorbed in really serious business to hear much of it. I laid down on the forward end of the "palo" and the pilot with my bundle of clothes took his place behind. The craft did sink, though as the pilot had prophesied, we did not go entirely under water. The eddy current carried us in an upstream direction when the pilot pointed the "palo" in a direction at right angles to the daring current. A few vigorous strokes and we were struck by it. I would have been shifted from my position but that I had a death grip on that "palo" with my arms. For a moment we were submerged, then perched high upon the temporary peak of a "riffle" wave; down again, up again, while the river bank seemed to be passing up stream at express train speed. Before I could collect my wits the nose of the "palo" turned up stream in eddy water and my foot touched bottom. We were across. It was done so quickly that I could hardly realize that I had passed the ordeal. I looked up stream and saw the diminutive figure of Turner half a mile above standing on the rocks where I had left him slapping his sides with his arms rooster fashion, bravely applauding my accomplishment.

Turner was next. The third pilot was lighter in weight and not so strong and capable as the other two. Turner did not care. He placed himself ahead of the slender craft with a nonchalance and careless abandon that I verily believe would be his demeanor were he entering the gates of Paradise or descending into the Fit. It soon became evident that Turner and his pilot were not going to bend so high up stream as did the alcalde and myself. I hastily picked up two sticks and arranged them in the form of a cross and held them up before the eyes of Turner as he passed. He recognized the symbol of his imminent demise. I saw his lips move, but the roar of the river drowned his remarks. Even if I had heard them nothing would have been added to this story on account of the censor. He landed 200 yards below.

Kitchen Supplies of the Better Kind

We are showing the most complete line of Enameled Ware, Aluminum and Tinware in the city. This stock has been carefully selected and is priced right.

Whether you are in need of an odd piece or two or the complete equipment for the kitchen we would be glad to show these lines

Talbot & Hubbard, Inc.

Hardware.

"At the Sign of the Dog."

The pilots returned to the opposite shore and brought over the interpreter and the peon. Later the mules and the baggage were brought over safely. For this service the pilots charged me 120 pesos, Colombian money, equivalent to \$120 in American gold. It is considered good policy in Colombia to reward every bill as extortionate and to haggle industriously over it, but thankfulness for the safe passage of the Satale river caused me to violate the traditional procedure and to pay double the amount charged. I had the fact in mind that parallel service in this country would have cost me \$20.

We spent the night in Barbacoas, from which point the examination of the mining properties was to commence. In the course of the examinations we crossed the river many times on "palos." Though familiarity did not breed contempt for this dangerous stream, it took the wire edge off of the fear of it.

Some enterprising individual should go to Colombia and secure a few of these Cauca river raftsmen and establish a "palo" ferry over the Niagara river in the gorge. Seekers after thrills would have their appetite satisfied in the fullest measure by a "palo" ride over the river.

There is Nothing Like it,
Nothing that can take the place of

Newbro's Herpicide

If you are troubled with dandruff, falling hair or itchy scalp, there is a world of comfort in NEWBRO'S HERPICIDE. Try it. One application will convince. The feeling of coolness, the sense of cleanliness and the exquisite odor are things you cannot forget. HERPICIDE is an efficient dandruff eradicator, a delightful hair dressing, a cleanser and an antiseptic.

NEWBRO'S HERPICIDE gives the hair a softness and luxuriance that is always associated with the use of this scalp prophylactic. Hair that isn't healthy cannot be pretty and attractive. HERPICIDE by rendering the scalp sweet and clean, makes the hair healthy and keeps it so. It is indispensable to the toilet—not a luxury, but a requisite.

SEND 10 CENTS FOR SAMPLE BOTTLE AND BOOKLET

Every man and woman is exposed to the attacks of dandruff which is contagious and ninety nine out of every hundred are suffering from it. The booklet published by The Herpicide Company, on the hair and scalp, is of immense interest, and HERPICIDE itself is a revelation to all. A sample bottle of NEWBRO'S HERPICIDE and the booklet will be sent to any address upon receipt of Ten Cents in postage or silver in cover cost of packing and handling. Address THE HERPICIDE CO., Dept. 8, Detroit, Mich.

Two sizes, 50c and \$1.00—Sold Everywhere—Guaranteed by The Herpicide Co.

Applications at the better barber shops and Beauty Parlors.
